

AUBREY STANTON

Major: Marketing

Minor: Creative Writing

Intended Career:

Social media/other marketing or data analytics for a publishing company (and a published author if possible!)

me at work!
#BTR
escape rooms!

crocheted a case for my kindle!

messed with layering images and exposure!

Technical Background: I am very proficient in Adobe Photoshop and Adobe Illustrator (as seen to the right), and I use them solely for creative purposes. I would love to use Adobe software in my job in the future if I can. I proficient enough in Microsoft Excel and Microsoft word (from IS 101) but am looking to improve my skills in that aspect, especially because it will be useful in most jobs I see myself doing. I mostly use my MacBook and iPad for any technology needs.

played around with 3D photoshop effects!

a cover I designed for a previous book idea!

Non-Technical Background:

I am a sophomore at UNR, and I chose UNR because honestly it was the cheapest option for me, but I also really liked the business program as well as Manzanita Lake specifically because I really love nature. I'm from Las Vegas, so I really needed a change of scenery from just a desert! I currently work at Break Through Reno as an escape room gamemaster at the GSR and I absolutely love it! Some of my interests/hobbies include dance, writing, crocheting, all different types of art (drawing, painting, digital, etc.), and reading. I will listen to just about anything when it comes to music, but my favorite artists are Billie Eilish and Stray Kids. At the moment I don't really have a favorite movie because I honestly can't choose, but my all time favorite TV show for 7 years now is "Supernatural." In the future I would love to work for a publishing company for marketing or data analytics, but the prime goal of mine is to become a published author, as I am currently in the process of writing a trilogy fantasy series, and writing a prequel novella that I will adapt into a television script for my screenwriting class!

A woodland butterfly scene!
- successfully changed the background from day to night
- made the butterflies glow and sparkle!
